ISBN:

Preface

A thesis/dissertation is a written product of a systematic study of a significant problem. It is important to adhere to the guidelines set forth in the Thesis Guide. This includes ensuring that the problem is clearly identified, the sources and methods of gathering information are well-documented, and that the conclusion or recommendation is supported by the data and analysis. Additionally, originality, critical thinking, and thorough documentation are essential components of a successful thesis.

This "THESIS GUIDE" document is crafted as an essential companion for students navigating the intricate path of preparing theses/dissertations, integral components of their graduate programs at the Postgraduate Unit, Uva Wellassa University. The fundamental objective of this guide is to establish a coherent framework, fostering consistency in the format and style of these scholarly documents. The guidelines outlined herein are to be steadfastly adhered to across all BSc(Hons), MSc, MBA, MPhil, and PhD degree programs administered by the Postgraduate Unit at Uva Wellassa University. Through this guide, we aim to empower students with the tools necessary for the successful execution of their academic endeavors, fostering a culture of excellence and precision within our scholarly community.

FORMAT AND BINDING OF THESIS

1 Preliminary Pages

1.1 Title page

The title should be short, concise, and descriptive. The title page should consist of the following information:

Title of thesis/dissertation, candidate's full name, Name of degree for which thesis is submitted, Name of the Board of Study (Department and the Faculty should be mentioned in the undergraduate thesis), Uva Wellassa University, and Year of presentation. If the title includes scientific names of organisms, those should be written in lowercase italics except for the first letter of the genus, which is always capitalized (See Specimen 4.2a and b).

1.2 Declaration

Declaration should be in the following form:

"I declare that this thesis/dissertation does not incorporate without acknowledgement any material previously submitted for a degree in any University or Higher Educational Institution in Sri Lanka or abroad and to the best of my knowledge and belief it does not contain any material previously published or written by another person except where due reference is made in the text."

The thesis should be certified by the relevant supervisor/s.

(See specimen 4.3a and specimen 4.4 for chapter by chapter and thesis by series of publications separately. See specimen 4.3b for undergraduate dissertation)

1.3 Dedication

A dedication is a single sentence that offers the work to someone who inspired you or helped you with it.

1.4 Abstract

The abstract page should carry the following before the text of the abstract:

The title of the project, the candidate's name, the affiliation and the address of the work-place where the research study was carried out. If a major part of the research study was carried out at a department/institution other than Uva Wellassa University of Sri Lanka (UWU), the address of the department/institution should appear before UWU. The abstract should not exceed 400 words and be printed single spaced on a single page. Having a single paragraph is recommended. (See specimen 4.5)

1.5 Acknowledgement

This should not be more than one page in length. It should contain the acknowledgement of the help given or work carried out by any other person or organization, and the funding agency where financial support was drawn.

1.6 Table of Contents

This must contain the main divisions of the thesis, the subdivisions, the bibliography, the appendix, and index. The page numbers must also be provided. (See specimen 4.6)

1.7 List of Tables

Each table's number, full title, and page number must be listed on a separate page from the one on which the table of contents is entered. (See specimen 4.7)

1.8 List of Figures

Figures, graphs, photographs, and other illustrative material are to be listed on a page separate from those containing tables. Number, title, and page are to be given. Figures must be numbered in Arabic numerals consecutively in order of appearance and captioned. (See specimen 4.8)

1.9 List of Abbreviations

All abbreviations used/made in the thesis must be listed properly.

1.10 Main Text

Postgraduate thesis can be presented as “traditional dissertation format” or as “thesis by publications” format. Undergraduate thesis can be presented as “traditional dissertation format”.

Traditional dissertation format shall consist of the following parts listed below.

1.10.1 Traditional dissertation format

Traditional dissertation format Chapters could simply be assigned as Introduction, Literature Review, Methodology, Results and Discussion (separate/combined), Conclusion and Recommendations (Method-1). However, if the postgraduate thesis has several different subprojects, each subproject could be assigned a chapter number and each chapter can have separate sections of Introduction, Methodology, Results and Discussion, Conclusions and Recommendations (Method-2). (See specimen 4.9)

Method 1	
	CHAPTER 1
	INTRODUCTION

	2.2 LITERATURE REVIEW
	1.2.1
	1.2.2
	
	
	

Series of Publication format shall consist of the following parts listed below.

1.10.2 Thesis by Series of Publications (Hybrid thesis model)

MPhil or PhD thesis can be presented as a series of publications. This hybrid thesis format includes at least one manuscript that has been published, or accepted for publication. In addition to published papers, the following papers can also be included in the thesis.

- Manuscripts prepared for future publication (in preparation)
- Submitted for publication (under review)
- Undergoing revisions after peer review (in revision)
- Accepted for publication but not yet published (in press)

In general, papers included in theses are original research papers. However, if parts or all of the literature review or methods chapter have been published these papers can also be included in the thesis. In all of these cases, an authorship declaration/statement of contribution should be included at the start of the relevant chapter. Students can include co-authored papers only if they have made a substantial and significant contribution to the work. If a student has not made a substantial and significant contribution to a paper and the paper does not contribute to the coherence of their thesis, this paper should be included as an annex, but not in the main body of the thesis. Students should label this appendix as “Additional research published during the course of candidature”.

Thesis should also include an additional introduction chapter at the beginning of the thesis and a Synopsis chapter at the end. In addition to those sections, additional text can also be included. Further it is required to have a conclusion and recommendation. For an example, linking text can be added to ensure a connection from one paper to the next. A literature review chapter and a methodology/methods chapter may also be included. In addition, additional text or chapter can be added to the thesis that describes research that was not included in the papers but is integral to the thesis.

Introduction and General Discussion Chapters

The introductory chapter should provide the outline of the topic, justification of the research, research aims (also called objectives, hypothesis, research questions etc) and the thesis structure, noting those chapters that include papers. The general discussion chapter at the end should provide a synthesis of the work as a whole presented in the body of the thesis. It should demonstrate the collective contribution to knowledge provided by the research described in the thesis and provide overall conclusions that address the research aims. Some disciplines may include an additional section or chapter that describes conclusion and recommendations for practice.

Linking Text or chapters/Bridging chapters

To maintain the coherence of the thesis as a series of papers, linking text can be added to connect one paper to the next. This linking text may or may not have a separate heading. If a heading is provided, it is commonly called the 'preface', 'chapter introduction', 'forward' or 'preamble'. Linking text could simply include an opening paragraph that indicates what thesis aim is addressed in the paper or as a separate bridging chapter. This paragraph might also link the paper to the preceding chapter and/or the proceeding chapter.

Literature Review and Methods Chapters (optional)

Thesis may include a literature review section that may appear as part of the introductory chapter, or as a separate literature review chapter or chapters, or distributed across the thesis as part of the linking text that precedes each paper.

Similarly, a methods or methodology chapter may also be included that expands upon the methods described in the papers (usually methodology section is abbreviated for publication). To avoid repetitions, candidates can choose to remove the introductions and/or methods from their papers and consolidate them in separate literature review and methods chapters.

Inclusion of Unpublished Research

Thesis may include additional text to the end of chapters or whole chapters between papers to present unpublished results that arise from the research.

Authorship Declaration/ Statement of Contribution

Principle supervisor should sign the authorship declaration/Statement of Contribution after receiving email or other correspondence from all Co-authors confirming their certifying authorship (See specimen 4.4)

Formatting

Published papers included in a thesis may be presented in one of the following formats;

- A clean version of the accepted manuscript as a Word document in which it was published in the journal
- Publishers' pdf files

Otherwise, the publications can be re-formatted (margins, line spacing, font style, table and figure numbers, and referencing style etc) for consistency with the remainder of the thesis. If the publications are presented as Word document, at the beginning of each chapter which contains a publication, a statement such as '*Part (or all) of the research contained within this chapter has been published as Authors, Title of Paper, Journal, Vol (issue) page numbers, year*', or appropriate citation format should be included. If original pdf files are used, this is not required.

Screen shots of the figures and tables presented in the published paper can be included as it is. Referencing can be done using the journal accepted style or can be re-formatted for consistency with the remainder of the thesis.

Recommended structure of the thesis by series of publications

Preliminary Pages

- Title page
- Declaration
- Abstract
- Dedication (optional)
- Acknowledgement
- Table of content
- List of tables
- List of figures
- List of abbreviations
- List of appendices

Main body*

- Chapter 1: Introduction and structure of the thesis
- Chapter 2: Literature Review (if necessary)
- Chapter 3: Methodology (if necessary)
- Chapter 4-6 (number can vary): Published papers/Manuscripts prepared for future publication (in preparation), submitted for publication (under review), undergoing revisions after peer review (in revision), accepted for publication but not yet published (in press)
- Chapter 7: Synopsis
- Chapter 8: Conclusions and recommendations
- References, including those already included in the research publication chapters
- Appendices

**Note: Authorship declaration/statement of contribution should be included at the start of the relevant chapter/s*

Although a thesis by publication may contain some repetition, it is expected that the repetition be minimal. All pages of the thesis should be numbered in a sequential order.

Copyright

Students need to check their publishing contracts/agreements for each paper with the respective publisher/s to determine what version of the published work can be included in the final version of the thesis. For example, some publishers may allow the final published version of a journal article to be included in a thesis, while others will only allow the manuscript to be included.

1.11 References

References are listed at the end of thesis/chapter, by using either the 'Author-Year' system or the 'Numeric' system. References throughout the text of the thesis as well as the list of references should follow **one** standard format, either Harvard, Vancouver or APA style. (See specimen 4.10)

1.12 Appendix (Optional)

Any detailed description, recipe, set of data, etc. that is not directly required for interpreting/explaining the project work/outcome could be included in an appendix.

Published journal articles arising from the thesis could also be attached.

1.13 Index (Optional)

Terms that appear in your thesis could be list in this section as a quick look up for the readers.

2 Preparation specifications

2.1 Size of Paper

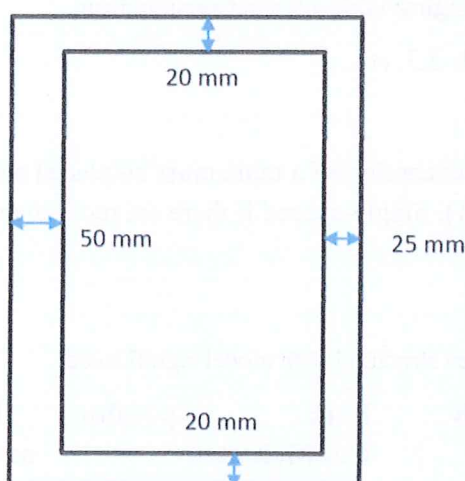

Good quality (80gsm) A4-sized (210 x 297 mm) white papers should be used. For special plates or similar types of illustrations, A4-sized papers of different qualities may be used, as needed. If other sizes of paper must be used it shall be mounted or folded to A4 size.

2.2 Layout of Type Script

These must be at least 50 mm (2") on the left or binding edge, 20 mm (3/4") on the head and tail margins and 25 mm (1") on the right-hand edge every page in type scripts (Layout 1)

All pages of the thesis should be computer printed only on one side of the page.

Layout 1

2.3 Text Font

Other than the places specified, such as the title page, Times New Roman, size 12, justified should be used.

2.4 Spacing

The printed matter must be double spaced except block quotations, notes foot notes, captions on

table and figures, the appendix and index. These may be single spaced with double spacing between the entries. The bibliography should be single spaced but with double spacing between entries.

2.5 Table and Figures

All figures and tables must fit within the margins described earlier. Tables should be placed close to the text. Table should have no vertical lines and should have as few horizontal lines as possible. Large tables and figures must be reduced in size to meet the margin requirements however, captions and page numbers should still appear at a normal size. Tables and figures may be rotated 90 degrees so that the bottom of the table or figure runs along the right edge of the page.

- *Numbering:* Figures and tables must be uniquely numbered in one of the following two manners:

Method 1: Associated chapter, section, subsection, and figure/table number designation,

e.g., Figure 1.1.3.2, 1.2.2, 1.3.2.2, etc...

Method 2: Associated chapter and figure/table number designation,

e.g., Figure 1.1, 1.2, 1.3, 2.1, 2.2, 2.3, etc....

- *Table Captions:* The number and caption of a table must be placed above the table using Times New Roman font (size 11). Single-spaced if there are more than one line. Refer the example given below.

e.g.,

Table 2.1: Estimate of the hypothesized structural path model significance

Hypothesis	Hypothetical Path	Path Coefficient	p-value	Test outcome
H _{1a}	EN—> BA	0.4425(3)	0.000**	Supported
H _{1b}	IN—> BA	0.4677(2)	0.000**	Supported
H _{1c}	TR—> BA	0.3192(5)	0.000**	Supported
H _{1d}	AD—> BA	0.5453(1)	0.000**	Supported
H _{1e}	CU—> BA	0.3914(4)	0.041*	Supported

*Supported at **p<0.001, *p<0.05*

Source: Authors' Elaboration extracted from AMOS.

- *Figure Captions:* The number and caption of a figure must be placed below the figure. Times New Roman font (size 11) and single-spaced if there are more than one line. Captions must be formatted in a consistent style throughout your document.

e.g.,

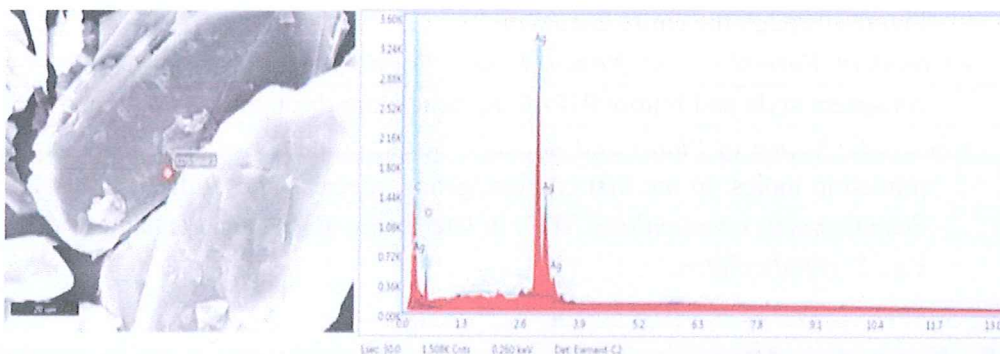

Figure 2.1.3: EDS spectra of silver vein graphite composite

Source: Authors' Elaboration

- *Table and Figure captions* should be self-explaining and should provide sufficient information to the readers without referring to the related text in the thesis.
- All Tables and Figures must be referred to the main body of the text by their number as example given below.

e.g.,

As shown in the Table 2.1, grain moisture content decreased steadily

or

Grain moisture content decreased steadily (Table 2.1).

2.6 Formulae/Equations, Mathematical Operations and Functions

- *Formulae/Equations:* Formulae must be printed with sufficient space left around them. Subscripts and superscripts should be clear and not too small. Meaning of all the symbols must be given immediately after an equation at its first use. For simple fractions, use of solidus (/) is preferred to horizontal line. Equations are to be numbered serially at the right-hand side in parentheses. Fractional powers are preferred to root signs. Powers of e could conveniently be denoted by exp.
- Use standard and consistent formatting of Formulae/Equations, Mathematical Operations and Functions through the entire document.

- *Scientific Units, Notation and Significant Figures*: Use the international system of units (SI). Keep a single space between two types of units. There should be *a space between the numerical value and the unit of measurement*. e.g., 20 mg – except for temperatures e.g., 20°C and percentages e.g., 20%. Do not indicate units as divisions, and instead, use a negative exponent. The level of significance could be expressed as $P_value (=0.xxx) < \alpha (=0.05)$. Maintain a consistent formatting of Scientific Units, Notation and Significant Figures through the entire document.
- *Chemical Formulae and Nomenclature*: Formulae must be formatted in standard and consistent style and follow IUPAC nomenclature throughout your document.
- *Scientific Names of Plants and Animals*: Scientific names of plants and animals should be printed in italics. In the first citation, genus, species, and authority must be given. e.g.: *Stemonoporus canaliculatus* Thw. In later citations, the generic name may be abbreviated, e.g., *S. canaliculatus*.

2.7 Numbering of Pages

Each page in the thesis should be numbered in consecutive order including illustrative material as well as text. Prefatory pages (from ‘Title Page’ to ‘List of Abbreviations’) must be numbered using lower-case Roman numerals (i.e., ii, iii, iv etc.), which should appear at the midpoint, 10 mm below the top-edge of the page. The title page is “i” but is not numbered. All the pages in the main body of the thesis (from ‘Introduction’ to ‘Last Page of Thesis’) must be numbered using Arabic numerals, beginning with 1, appearing at the midpoint, 10 mm above the bottom-edge of the page.

3 Binding

3.1 Cover Page

Cover page carries the title of the thesis/dissertation (Times New Roman - size 14) at the top of the page, candidate's name in the middle, and the year (Times New Roman - size 14) of the effective date of the degree at the bottom (see Specimen 4.1a/b). Title of the thesis/dissertation should be informative and descriptive of the work done and approved by the relevant Board of Study, Postgraduate thesis/ Faculty must be spirally bound during its initial submission, and hard bound in its final submission.

Spine of the hard-bound copy should also carry all this information but with a smaller font size, Times New Roman - size 10 (see Specimen 4.1). If the approved title is too long for the spine, the approved short title may be used.

3.2 Specified Colours for Binding

Cover page of the hard-bound thesis must be made of rexin in the specified colour assigned for each degree and inscriptions on both the cover page and spine of the hard-bound copy are made in gold/silver lettering as given below.

- SLQF Level 6(BScHons)- Black Colour (HTML Hex Color Code - #000000/ RGB code 0,0,0) and Silver Lettering HTML Hex Color Code - #C0C0C0/ RGB code 192, 192, 192)
- SLQF Level 10(MSc/MBA): Green Colour (HTML Hex Color Code - #008000/ RGB code 0,128,0) and Silver Lettering HTML Hex Color Code - #C0C0C0/ RGB code 192, 192, 192)
- SLQF Level 11 (MPhil): Blue Colour (HTML Hex Color Code - #000080 / RGB code 0,0,128) and Silver Lettering (HTML Hex Color Code - #C0C0C0/ RGB code 192, 192, 192)
- SLQF Level 12(PhD): Maroon Colour (HTML Hex Color Code- #800000 / RGB code 128,0,0) and Gold Lettering HTML Hex Color Code - #FFD700/ RGB code 255,215,0)
- Example:

SLQF Level	6	10	11	12
RGB code for Thesis cover	0,0,0	0,128,0	0,0,128	128,0,0
Sample colour				

3.3 Draft Copy

Spiral binding is adequate when submitting initially for the marking examiners. Three copies must be submitted for postgraduate thesis.

3.4 Final Copy

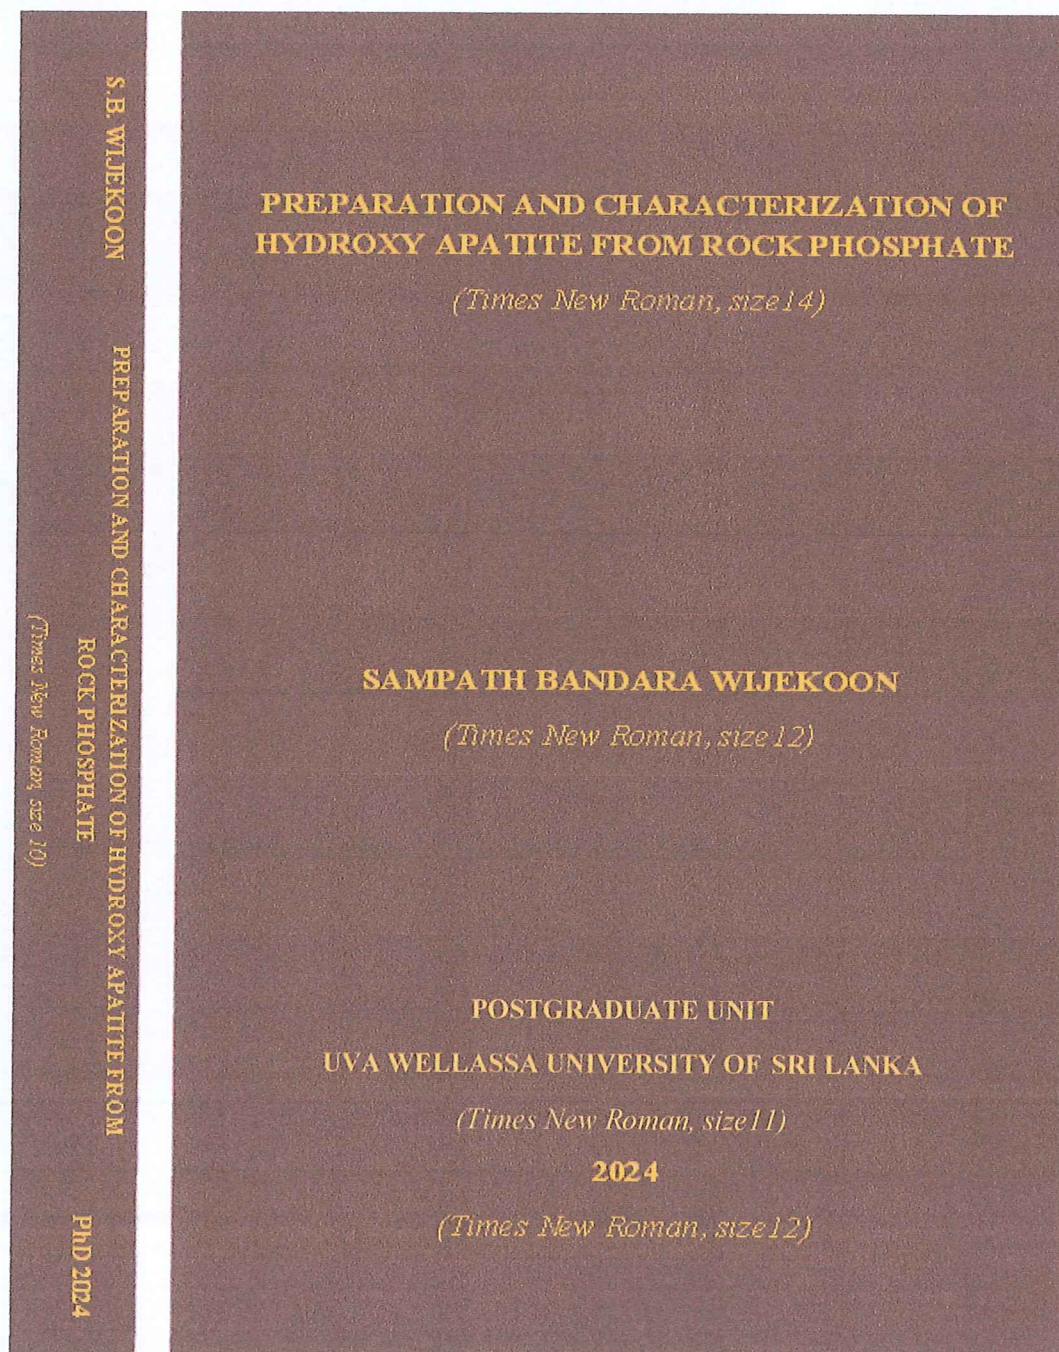

For postgraduate thesis, a minimum of three copies sewn and bounded in strong, waterproof material (Rexin) in prescribed colour should be submitted after incorporating all corrections suggested by examiners. For undergraduate dissertation, please follow the specific guidelines given by the respective Faculties/ Departments.

Lettering on outer cover of all copies: See the specimen 4.1a/b

On spine: The degree, name of the author and year of presentation should be given in respective colours (BScHons, MSc, MBA and MPhil- Silver lettering/ PhD- Gold lettering) using font size 10 (See the specimen 4.1a/b). The lettering shall run vertically from top to bottom.

The authors listed below have certified that: *(body: Times New Roman, size 11)*

1. they meet the criteria for authorship in that they have participated in the conception, execution, or interpretation, of at least that part of the publication in their field of expertise;
2. they take public responsibility for their part of the publication, except for the responsible author who accepts overall responsibility for the publication;
3. there are no other authors of the publication according to these criteria;
4. potential conflicts of interest have been disclosed to (a) granting bodies, (b) the editor or publisher of journals or other publications, and (c) the head of the responsible academic unit, and
5. they agree to the use of the publication in the student's thesis consistent with any limitations set by publisher requirements.

In the case of this chapter:

4.10 Specimen Referencing Guide

All references cited in the thesis should appear in the reference list and all references in the reference list should appear as citations in the thesis. The reference list should be formatted to comply with one of the two following methods.

There are two common systems for referencing are Numeric System and Author-Year System.

1. Numeric System

These involve the use of sequential numbers as in-text markers that refer to either footnotes or endnotes.

- Footnotes: these are notes included at the end of each page.
- Zotero; Endnotes: these are notes on a separate page at the end of a paper (not to be confused with EndNote, a reference management system).

Common note systems include Chicago 17th A and Vancouver.

2. Author-Year System/Paranthetical systems

Also known as Author-date or Harvard referencing, paranthetical referencing involves the use of a partial reference contained within parenthesis as in-text markers (such as the author and date). The complete reference is then included in a list on the last page of the document.

Common paranthetical systems include APA, Harvard, and MLA.

Recommended manual/guide for Harvard, APA or Vancouver styles are as follows.

4.10.1 Harvard style referencing

Harvard is a common name used to describe the Author / Date approach to referencing. As such, there is no one official manual.

Our recommendation is to start with the guidance provided in:

Style manual for authors, editors and printers (6th ed.). (2002). John Wiley & Sons.

Or

Alternative guides when the published manual is not available: *University of Sydney Guide to Harvard Referencing Style*

- Citations in the body of the thesis

The Harvard citation style is an Author-Date referencing system.

- Reference List

A Harvard reference list should be ordered alphabetically by author and then chronologically by year of publication.

4.10.2 APA style referencing

The official published manual for APA 7th is:

Publication manual of the American Psychological Association : the official guide to APA style. (7th ed.). (2020). American Psychological Association

- **Citations in the body of the thesis**

The APA in text reference is in the format **(author, date)**. When directly quoting from a text you must include a page number in the citation

- **Reference List**

Your reference list should be ordered alphabetically by author and then chronologically by year of publication.

4.10.3 Vancouver referencing style

Vancouver is a term used to describe the referencing style developed by the International Committee of Medical Journal Editors (ICJME).

The following publication provides a comprehensive set of examples of application of the style;

<https://www.ncbi.nlm.nih.gov/books/NBK7256/>

- **Citations in the body of the thesis**

The Vancouver referencing style is a numeric style used in the medical sciences.

- **Reference List**

In the Vancouver style references should appear at the end of the text of your essay/paper listed numerically in the order that they were cited in the text.
